About Our Project

We are pleased to share the progress of the "Grow Confidence" project, aimed at enhancing confidence among primary school teachers and students through a comprehensive training program. Our approach focuses on a variety of supportive resources and tools designed to empower both teachers and parents in creating a confidence-building environment for students.

Updates and Resources

1. Workshop Structure for Parents and Students:

In addition to core training, we developed workshops for parents that allow them to better support students in building confidence. We have prepared a draft design for the parent workshop pack, complete with translated content and enhanced versions, now available for download.

Highlights

We are also finalizing the Strategy for Piloting Teacher Training, which will support the successful implementation of the program across primary schools. Additionally, our pre-workshop questionnaire provides personalized feedback for teachers, allowing them to tailor their approaches to better meet student needs. Thank you for your support and partnership in fostering a trustworthy and inspiring educational environment in primary schools. We look forward to continued collaboration and to making this project a lasting success.

2. Focus Groups and Reports: Focus groups were conducted to provide key insights into the program's effectiveness. We are pleased to share the Summary Report of Focus Groups, which presents findings and valuable feedback from participants, helping us further refine the program.

3. Online Educational Resources:

Our online learning modules allow teachers to acquire confidence-building skills flexibly through short, engaging sessions. The Grow Confidence Online Educational Resource Framework offers adaptable resources, enabling teachers to advance at their own pace and deepen their competencies.
