GROW CONFIDENCE
IN PRIMARY SCHOOL CHILDREN

Dear Grow Confidence Community,

We're thrilled to share the main results of our Erasmus+ project, particularly focusing on the teacher training component aimed at nurturing students' self-confidence and emotional intelligence. Here's a glimpse into what we've been working on:

Our research revealed that teachers from our target group lack the necessary skills and knowledge to effectively support children in building their self-confidence. Recognizing this gap, our project aimed to provide them with the motivation, detailed activities, and materials necessary to integrate confidence-building strategies into their curriculum.

Teacher Training on Growing Mindset

Thank you for your ongoing support and dedication to the Grow Confidence project. Together, we're making a difference in the lives of students around the world.

Empowering Teachers:

Through our training program, teachers will be equipped with practical techniques to encourage students to take responsibility for their actions, embrace mistakes as opportunities for growth, and develop their unique learning styles. Moreover, they will learn how to foster emotional resilience in their students, preparing them to navigate life's challenges with confidence.

Tailored Resources

: We've developed comprehensive teaching content, methodologies, and activities that teachers can seamlessly incorporate into their classrooms. These resources have been designed for immediate implementation, ensuring that teachers can start making a difference in their students' lives right away.

Measuring Success:

To assess the impact of our training program, we've created pre- and post-assessment tools to gauge participants' learning outcomes. This data will enable us to refine our approach based on real-world feedback, ultimately enhancing the effectiveness of our training.

**Make
difference**

A PROGRAM FOR ALL:

Our ultimate goal is to create a versatile training program that can be adapted and implemented in diverse educational settings. By translating our materials into multiple languages, we aim to make our resources accessible to educators worldwide, fostering a global community dedicated to nurturing students' confidence. Looking Ahead: As we move forward, we'll continue to refine our training program based on feedback from pilot testing and focus groups. Through collaborative efforts, we'll ensure that our methodology remains relevant and impactful, empowering both teachers and students on their journey towards confidence and self-discovery.
